***Response to Arguments***

1. Applicant's arguments with respect to **claims 1-24** have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

**Claims 1-7 and 17-24** are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 17-19 are directed to a judicial exception to 35 U.S.C. 101 (i.e., an abstract idea, natural phenomenon, or law of nature) and are not directed to a practical application of such judicial exception (e.g., because the claims do not require any physical transformation and the invention as claimed does not produce a useful, concrete, and tangible result). The claim recites instructions on a processing platform, which does not result in a physical transformation or tangible result of the processing steps claimed.

Further, Claim 17 provides evidence that claims 1-7 and 20-24 are disembodied processes, since claim 17 provides a process (i.e., an article comprising a computer readable storage medium having stored thereon instructions executed by a processing platform). Reference U.S.C. 101 Interim Guidelines pages 20-22.
